Many items lend themselves to hand-striping applications, allowing you to bring out details not only of the furniture but in your surroundings as well.

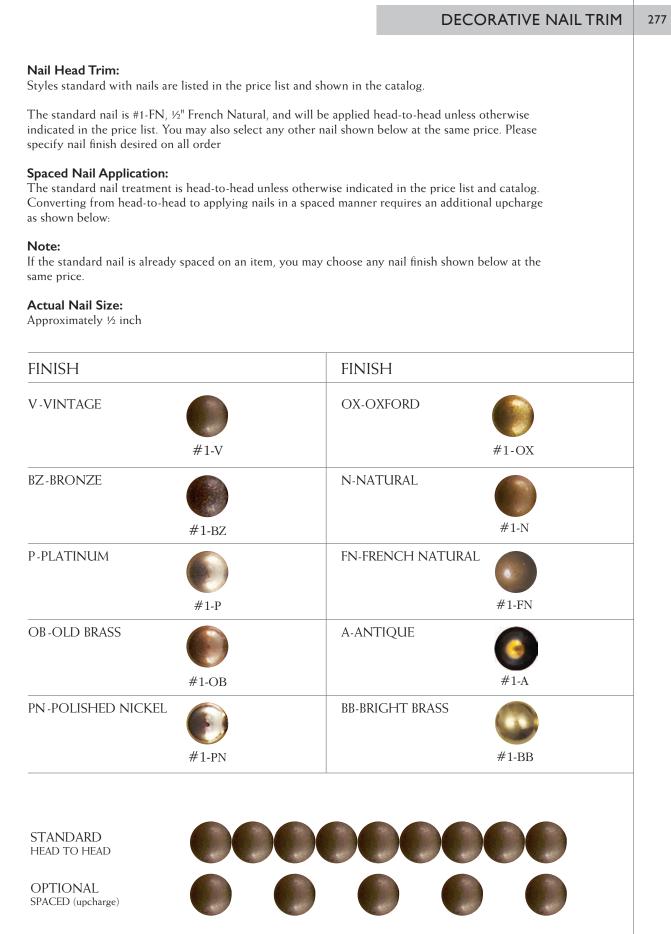

Sherrill Occasional artisans are capable of hand-striping many items from our Select Collection of domestically made product, displayed in this catalog with the American flag icon. This allows you to add detail to your choice of primary custom finish and further enhance the product to make it your own. There are 11 striping colors from which to choose as shown above.

It is often apparent where an item might be striped: raised moldings, routed grooves, or incised decorative detailing. We can also hand stripe borders and edge treatments on many flat surfaces like tops, aprons, and side panels. A variety of items appear striped in the catalog providing suggested treatments.

Feel free to discuss the appropriateness of a striping application with your factory representative or one of our customer service specialists.
