7. Select Your Perfect Finish

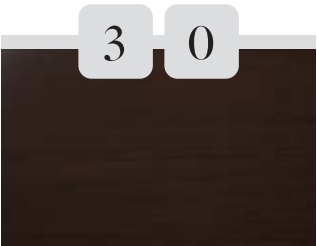

The maple solids and maple veneers used on these products are natural materials that absorb finish differently from one piece of wood to the next.

Most Revealing Finishes

Cashew (C4) and Walnut (30) are our least concealing finishes and highlight the unique character of each piece of wood on the furniture. These are clear finishes that bring out the differences in color and grain pattern of each piece of wood on the furniture.

Cashew

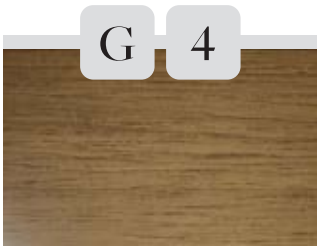

Walnut

Medium Coverage Finishes

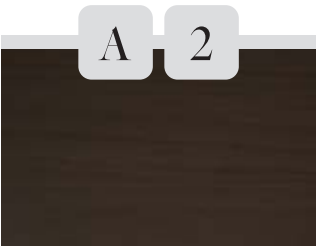

Cotswold (G1), Greystone (G4), Modern Elm (A2) and Ore (G3) are medium to darker finishes that showcase the wood character and use their own color base to balance out the natural color variation in the wood. The medium stains allow the natural wood character to show through, while the darker finishes create more consistency.

Cotswold

Greystone

Modern Elm

Ore

Most Consistent Finishes

Mushroom (M1), Sandstone (P6) and Steel (G2) use a paint base, light brushing and color hangup to accent the texture of the woods. These finishes create a high level of finish consistency from piece to piece and mask the natural colors of the wood, while allowing the grain and texture to show through.

Mushroom

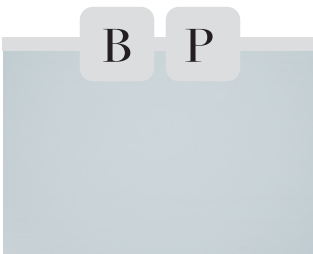

Sandstone

Steel

Painted Finishes

Sky (BP), Navy (NP), Sage (GP), Coal (CP) and Cotton (WP) are painted finishes that create the most consistency and conceal the natural colors of the wood, while allowing the grain and texture to show through.

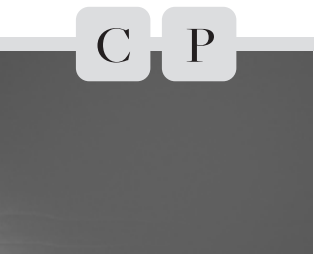

Sky

Navy

Sage

Coal

Cotton

What type of wood is the furniture made of?

Sherrill Custom Cabinets by Design are made with Maple Veneers and Maple Solids sustainably harvested in the USA.

Custom Finishing Details

Color Match, Combination Finishes and Hand Striping are available in Custom Cabinets by Design program. See price list for details.
